Michael J. Racich DMD, FAGD, is a 1982 graduate from the University of British Columbia and has a general dental practice emphasizing comprehensive restorative dentistry, prosthodontics and TMD/orofacial pain. Dr. Racich is a member of many professional organizations and has lectured nationally and internationally on subjects relating to patient comfort, function and appearance. He is a Fellow of the Academy of General Dentistry and the American College of Dentists as well as a Diplomate of the American Board of Orofacial Pain and the International Congress of Oral Implantologists. Dr. Racich has published in peer-reviewed scientific journals such as the Journal of Prosthetic Dentistry and the Canadian Dental Journal and has authored the books: The Basic Rules of Oral Rehabilitation (2010), The Basic Rules of Occlusion (2012) and The Basic Rules of Facially Generated Treatment Planning (2013). Currently he mentors the didactic/clinical FOCUS Dental Education Continuum (study clubs, proprietary programs, coaching, 2nd opinions only).

**TUITION FEE**

**DENTISTS:** $3400  
Continental Breakfast and Luncheon included.  
A non refundable deposit of $800 is due upon registration.

**TIMES**

**COURSE TIMES:**  
9 am – 5 pm

**LOCATION**

Nobel Biocare Oral Health Centre  
2151 Wesbrook Mall, UBC, Vancouver

Faculty of Dentistry, University of British Columbia

**PARKING**

Parking at UBC is available in the Health Sciences visitors parkade weekend and evenings. Parking is also available under the Staples store in UBC village.

**Continuing Dental Education, Faculty of Dentistry**

is an ADA CERP recognized provider

**Dr. Mike Racich**

October 2016 - April 2017

**Limited Enrolment**

Pre-registration is advised.

Please register as early as possible to reserve a space!
COURSE OUTLINE

Today, when treatment planning comprehensive dental care, a practical approach is to first meet the person, next the face, then the mouth and finally the teeth, i.e. Facially Generated Treatment Planning. Whether we are planning fixed or removable restorative or prosthodontic care, Facially Generated Treatment Planning facilitates positive patient outcomes and realistic expectations. A useful method of learning these skills is to employ removable prosthodontic strategies and techniques to conceptualize, prototype and carry out patient care. For example, the setting-up and/or the readjusting of denture teeth can be quickly done allowing practitioners to “practice” in real time facial and intraoral esthetics, cosmetics, form and function, thereby aiding future treatment planning for either fixed or removable cases.

Are you currently providing removable prosthodontic care for your patients, most notably complete dentures? If so, are you comfortable with your current clinical level? If not, would you like to add removable prosthodontics to your routine office procedures, especially for those seeking implant retained prosthetics? This eight part clinical/didactic Program will address your concerns and elevate your diagnostic, treatment and management acumen in removable prosthodontics. Certified Dental Technician support will be provided for each clinical session (to assist with tooth placements, waxing, etc.) as well as course lecture and technique handouts and texts.

Learning objectives:
- Evidence-based dentistry: what it is and is not
- Practice management considerations
- Facially Generated Treatment Planning
- Complete Dentures (CD): principles and treatment
- Removable Partial Dentures (RPD): principles and treatment
- Removable prosthodontics and implants
- Maintenance considerations

Patient Record Requirements:
- Up-to-date charting (odontogram, hygiene, radiographs, etc) and medical history.

Upon registration an Armamentarium List will be provided.

Removable Prosthodontics for The General Practitioner
Dr. Mike Racich
October 2016 - April 2017
Saturdays 9 am – 5 pm

October 1, 2016
Program overview and patient requirements; didactic (Removable Prosthodontics: Considerations for Edentulous, Dentate & Implant Patients)

November 5, 2016
Patient evaluations, preliminary records, and treatment planning (CD & RPD)

December 3, 2016
CD anterior set-up and associated records

January 21, 2017
CD wax try-in; occlusal equilibration basics

February 18, 2017
CD delivery; RPD definitive records

March 4, 2017
CD post-op evaluation; RPD try-in

April 1, 2017
RPD delivery; case discussions and treatment planning

April 22, 2017
CD/RPD follow-up; case discussions and treatment planning
