Improve Your Root Canals by Learning About Endo Advances & Controversies
Dr. Manor Haas

This practical course, full of honest tips, tricks and advice, is for general dentists who want to keep up-to-date with hot topics, controversies and advances in endodontics. And, if you haven’t changed your root canal protocols in the past two years, then this is a course for you.

The pros and cons behind nearly all aspects of endodontics will be discussed. Review misconceptions and current guidelines for use of intra-canal medications, analgesics and antibiotics in endodontics, and the salvageability and restoration of endo-treated teeth.

LEARNING OBJECTIVES
• Understand the FACTS BEHIND ENDO CONTROVERSIES that directly impact your patients, your procedures and your dental practice
• Learn about CONTROVERSIES: the pros and cons of various NiTi files and obturation systems, single visit endo, to save or extract, prognosis of endo vs. implants, antibiotics and analgesics in endo
• Learn about ADVANCES: in NiTi files, apex locators, new obturators, 3D imaging-assisted diagnosis, intra-canal medications
• Learn which ENDO TECHNIQUES AND ARMAMENTARIA do not have clinical benefits and which do benefit your endodontic treatments by simplifying and improving your root canals

TUESDAY, FEBRUARY 4, 2020
8:00 AM - NOON

ENDO vs. IMPLANTS: Retain or Replace (Why and How)
Dr. Manor Haas

This non-bias program helps dentists with the decision making process they face nearly every day in their practice: to save or to extract. Fundamental guidelines for proceeding with endodontic treatment and for replacement with an implant are discussed. The course is meant to be very interactive and incorporates 3D imaging and HD videos. The program is tailored to novice and experienced dentists.

LEARNING OBJECTIVES
• Learn by point and counter-point reviews of many cases whether teeth should / could be saved with endodontic treatment, or replaced with implants
• Review the most current endodontic, surgical and prosthodontic protocols, materials and techniques
• Learn why and how to retain or replace teeth

WEDNESDAY, FEBRUARY 5, 2020
FREE DAY

The Big Island is the largest most exciting of the Hawaiian Islands. Known as the “adventure island” the Big Island boasts some of Hawai‘i’s most varying landscapes and unique experiences. From vast valleys to white sand beaches and volcanic craters, the Big Island is home to an abundance of jaw dropping natural beauty. Visit Mauna Kea and star gaze, get up close to manta rays on a night dive, visit the farmers market or hike the Waipio Valley, swim with wild dolphins or snorkel in Kealakekua Bay. As one of the least developed of the inhabited Hawaiian islands, the Big Island is simply spectacular!

MANOR HAAS, DDS, CERT ENDO, MSC(D), FRCD(C) is a Certified Specialist in Endodontics who is extensively and passionately involved in continuing education (lectures and workshops) to general dentists and specialists. He is a Fellow of the Royal College of Dentists of Canada and is on Staff at the University of Toronto Faculty of Dentistry and the Hospital for Sick Children.
Let's Grow Tooth

Dr. Jack Griffin

Ever had a patient say “Doc, that tooth was never a problem until you fixed it”? Let’s stop the madness. Wouldn’t it be wonderful if we could make the tooth grow? With newer regenerative/bioactive materials we can stimulate dentin healing and self-repair in our direct and indirect restorations all while reducing sensitivity. These materials promote oral health by decreasing plaque, reduce bacterial accumulation, or promote cells to cause regeneration of tissues.

LEARNING OBJECTIVES
• The bioactive/regenerative environment….why, how, and what materials
• The latest in regenerative materials: liners, dentin replacements, cements, restorative materials to provide an environment where tissues can heal
• The most durable indirect restorations ever: zirconia and lithium disilicate crowns formation and sealing of the restoration margins
• Efficient direct composite placement – preparation, bonding, matrix selection, bulk fill and bioactive materials for long term oral health
• Soft tissue optimization: lasers, medicament’s, and other goodies for soft tissue excellence

Cementation Sanity

Dr. Jack Griffin

Leakage, breakage, lost restorations, sensitivity, staining......oh my! It’s a confusing dental world out there. Was the failure because of the prep, impression, lab, or me? CAD/CAM or pressed, cement or bond, layer or monolithic, etch or no-etch, dry or moist, light or chemical cure......? Let’s stop the madness. Ever had a patient say “Doc, that tooth was never a problem until you fixed it”? Advances in durable tooth colored restorative materials means changes in preparation and cementation techniques. Our goal is to end the uncertainty with the newer materials and learn how to have the ultimate success with today’s indirect materials from planning to preparation to placement.

LEARNING OBJECTIVES
• The more durable indirect esthetic indirect materials...monolithic, maximum strength, acceptable esthetics, minimum effort, great preparations, and long-term clinical success
• The classifications of luting materials, benefits to each and when to use retention and restoration strengthening
• Simplifying cementation choices – when to bond, when to cement, when to cure, what to use with focus on regenerative materials when the prep is good and maximum adhesion when needed
• Review of digital impression techniques and the role of CAD/CAM dentistry. Does it fit your practice?
• The backbone of the restorative practice with posterior restorations and how to apply those techniques for the best, most durable anterior aesthetic cases, veneers, implants, and bridges

Jack D Griffin Jr, DMD, MAGD, AAACD, ABAD, Dr Griffin has led an exceptionally efficient practice in St Louis county Missouri where he practices all phases of general dentistry from high end cosmetic procedures to “every day” restorative and preventive care. He is one of a very few dentists to be awarded by his peers Diplomat status with the American Board of Aesthetic Dentistry (ABAD), accreditation with the American Academy of Cosmetic Dentistry (Aacd), and Mastership in the Academy of General Dentistry (AGD), and Diplomate Society for Dento-Facial Aesthetics. He has been involved in product evaluation and development with Reality Esthetics, the Dental Advisor, Dental Products Report, and others. Jack is a clinical director for the Pacific Aesthetic Continuum (PAC) and is a selected member of Catapult Elite, a group of KOLs and honored speakers.
