ANNUAL

SKI SEMINAR

IN

WHISTLER

FEB 28 - MARCH 1, 2020

FOUR SEASONS RESORT

PROGRAM OVERVIEW

This course will be presented in 3 sessions, each building on the other. The course will provide the latest evidence-based information on caries risk assessment and caries management that will aid the practitioner in delivering optimal care for all patients in clinical practice. Drs. Crystal and Featherstone will present the latest methods and materials available (including silver diamine fluoride) for managing dental caries on patients of all ages, including the risks and benefits.

The course will describe the tools to implement "caries management by risk assessment" in the dental office. Implementation in dental practice provides patients with genuine hope and success in the management of their oral health. It is a practice builder.

This course is appropriate for pediatric dentists, general dentists, prosthodontists, endodontists, orthodontists, dental hygienists, dental assistants and front desk personnel. It is especially beneficial when all members of the dental office take the course together.

9 HOURS OF INSTRUCTION

LIMITED ENROLMENT - PRE-REGISTRATION IS ADVISED

COURSE TIMES

FRI. FEBRUARY 28	Registration	3:00 PM
	Course Time	3:30 PM - 6:30 PM
	Cocktail Reception	6:30 PM - 7:30 PM
SAT. FEBRUARY 29	Course Time	3:30 PM - 6:30 PM
SUN. MARCH 1	Course Time	8:00 AM - 11:00 AM

REGISTRATION INFORMATION

TUITION

	Until Dec 1	After Dec 1
Dentists	\$845	\$895
Allied Dental Personnel	\$475	\$495

LOCATION

Four Seasons Resort, Whistler, BC

The Four Seasons Resort is offering special hotel conference rates if you make your reservation before January 29, 2020 (based on availability). Please quote: **UBC Continuing Dental Education - Annual Ski Seminar** when booking. Please book your accommodation early to ensure a reservation. Registrants are required to make their own accommodation arrangements. E: reservations.whi@fourseasons.com P: 1-888-935-2460 W: fourseasons.com/whistler

PROGRAM

FRIDAY, FEBRUARY 28, 2020

3:30 PM - 6:30 PM

Preventive Therapies for the Management of Dental Caries

Dr. John Featherstone & Dr. Yasmi O. Crystal

This session will summarize the science behind the "caries balance" concept, which is the key to caries management by risk assessment in clinical practice. If pathological factors prevail caries progresses. If protective factors prevail the caries process is halted or reversed. Fluoride products and delivery systems, antibacterial therapy, dietary modification, silver diamine fluoride and minimally invasive restorative methods will be described.

LEARNING OBJECTIVES

- Understand the process of dental caries as a bacterially triggered disease and the many factors that influence the disbalance of the oral microbiome
- Understand and know the pathological and protective factors related to caries initiation, progression and prevention clinically
- Know the type and availability of fluoride products and delivery systems, antibacterial therapy, dietary modification, silver diamine fluoride and minimally invasive restorative methods for caries control

SATURDAY, FEBRUARY 29, 2020

3:30 PM - 6:30 PM

Caries Management by Risk Assessment for Ages 6 Years Through Adult

Dr. John Featherstone & Dr. Yasmi O. Crystal

This session will describe how to assess caries risk for patients in the age group 6 years through adult as low, moderate, high or extreme. The participants will learn how to assess caries risk and how to use the risk level as the basis for individualized treatment plans for the effective management of dental caries. Several clinical cases will be examined. This course will provide updates on evidence to support this approach to caries management, including an update on the latest products available based upon the information learned in session 1.

LEARNING OBJECTIVES

- Learn how to perform caries risk assessment in the age group 6 years through adult,
- Understand the principles of clinical intervention in the caries process, and how to put this into dental practice based upon the caries risk level

PRESENTERS

JOHN D.B. FEATHERSTONE, MSC, PHD

Dr. John Featherstone is Dean Emeritus of the School of Dentistry at the University of California, San Francisco (UCSF) and Professor Emeritus of Preventive and Restorative Dental Sciences. He holds a Ph.D. in chemistry from the University of Wellington (New Zealand). His research over the past 44 years has covered several aspects of cariology (study of tooth decay), and he was a

pioneer in research on laser interactions with hard tissues. He is currently active in implementing caries management by risk assessment in several venues across the world. He has received numerous National and International awards, including the Norton Ross Award for excellence in clinical research from the American Dental Association (2007). He is as an Honorary Fellow of the American College of Dentists, the Pierre Fouchard Society, an honorary lifetime member of the Academy of Laser Dentistry and also the American Dental Association. He has published over 300 papers and book chapters.

SUNDAY, MARCH 1, 2020

8:00 AM - 11:00 AM

Caries Management by Risk Assessment for Ages 0-5 Years

Dr. Yasmi O. Crystal

This session will describe how to assess caries risk for children in the age group 0-5 years as low, moderate, high or very high. The participants will learn how to assess caries risk and how to use the risk level as the basis for individualized treatment plans for the effective management of dental caries in infants and toddlers. This age group requires very special approaches that are different from those used for older children and adults. Several clinical cases will be examined. This course will provide updates on evidence to support this approach to caries management, including an update on the latest products available.

LEARNING OBJECTIVES

- Learn how to perform caries risk assessment in the 0-5 year age group,
- Understand the principles of clinical intervention in the caries process in this age group, and how to put this into dental practice based upon the caries risk level
- Learn appropriate therapy for the management of caries for each of the assessed caries risk levels in this challenging age group.

YASMI O. CRYSTAL, DMD, MSC, FAAPD

Dr. Yasmi O. Crystal has a DDS degree from Universidad Tecnologica de Mexico (UNITEC), a DMD from the University of Medicine and Dentistry of New Jersey (UMDNJ), got her Pediatric Dental specialty training from Eastman Dental Center, University of Rochester and has a Masters in Science in Clinical and Translational Research from NYU Medical School. She is

a Diplomat and an Examiner for the written and oral sections of the American Board of Pediatric Dentistry. She is the founder and senior specialist at Comprehensive Pediatric Dentistry in New Jersey and New York City, and Clinical Professor of Pediatric Dentistry at New York University, College of Dentistry. Dr Crystal is a leader in inter-professional relations, and is currently an Oral Health consultant and speaker for the New Jersey Academy of Pediatrics (DentaQuest access grant). She lectures extensively to health care audiences in the US and abroad, and has published several articles in peer reviewed scientific journals.

CANCELLATION POLICY

Full refunds less a \$100.00 service charge will be granted for cancellations made 60 days prior to the course. Cancellations made between 30 and 60 days prior to the first day of the program will receive a 50% refund. No refunds will be granted for cancellations made less than thirty days prior to the first day of the program. Continuing Dental Education at The University of British Columbia reserves the right to cancel courses, or switch instructors if deemed necessary by low enrolment, instructor cancellation or other unforeseen issues. In case of course cancellation a full refund will be issued.

ADA CERP® | Continuing Education Recognition Program

CDE at UBC is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at www.ada.org/cerp

DISCLAIMER: Dental education institutions have an obligation to disseminate new knowledge related to dental practice. Some presentations may include controversial materials or commercial references. Sponsorship of a continuing education course by The University of British Columbia does not imply endorsement of a particular philosophy, procedure or product by The University of British Columbia.
