

As soon as you click on the **'LEARN ONLINE'** button (located on UBC CDE Online Learning webpage), you will be directed to our online platform. The screen shots below will guide through the steps required to enroll, create an account and/or login to an existing account .

To get started, you will need to click on your course of choice

The screenshot displays the UBC CDE Online Learning course catalog. At the top, there is a search bar. Below it, three course cards are visible, each featuring a title, instructor name, price, duration, and a brief description. The first card is for 'Xerostomia: This Course is Anything But Dry!' by Dr. Mark Donaldson, priced at \$50 for 1 hour, running from April 26 to April 30, 2023. The second card is for 'Medication-Related Osteonecrosis of the Jaw: Beyond BONJ' by Dr. Mark Donaldson, priced at \$50 for 1 hour, running from May 4 to May 3, 2023. The third card is for 'Herbal Interactions with Medications Commonly Used in Dentistry' by Dr. Mark Donaldson, priced at \$50 for 1 hour, running from May 4 to May 3, 2023. Each card includes a small icon of a document and a right-pointing arrow at the bottom right.

Course ID	Course Title	Instructor	Price	Duration	Start Date	End Date	Credits

Dry mouth is a pervasive oral health problem, with up to 50% of the population experiencing this condition. Factors such as age, gender, and medications play significant roles in correctly diagnosing this presentation. The subjective feeling of dry mouth is often referred to as xerostomia but may be more correctly diagnosed as salivary gland dysfunction: a reduced volume of saliva secretion or a change in salivary composition.

Symptoms of dry mouth may range from mild oral discomfort to significant oral disease that can negatively impact patients' health, dietary intake, and quality of life. Despite the significant prevalence of xerostomia in the general population, however, no standard treatment guidelines exist. Successful treatments are typically individualized for the specific patient and should be targeted at the underlying pathophysiology of the disease. For these reasons, an accurate diagnosis of xerostomia is paramount so that patients may be offered the best treatment possible, and this treatment often involves a multimodal approach.

CDE9393: Xerostomia, This Course is Anything But Dry! (1 hour course)

📅 Ends April 30, 2023, 1097 Days Remaining

A case-based update on the recognition, diagnosis and an evidence-based, systematic approach to the treatment of xerostomia. With an aging population retaining their dentition and on multiple medications to treat chronic diseases, it is no surprise that this a growing population the prudent oral healthcare practitioner needs the latest knowledge to treat.
