A critical aspect of every patient intraoral examination is the observation of all the oral mucosae. The goal is to identify any changes that would not normally be expected. Once a change is identified a process should be initiated to achieve a final diagnosis. One change that is commonly seen in the oral mucosa is an ulceration. There are many different etiologies that can lead to the appearance of an oral ulcer and identifying the etiology is critical to instituting the appropriate course of clinical intervention.

The objective of this presentation is to review different causes of an oral ulceration, the diagnostic steps to identify the etiology, the clinical course typically seen with ulcers of different etiology and recommendations for procedures to definitively diagnose and treat the ulcer. The outcome of the material should help to provide a more comprehensive strategy to evaluate an oral ulcer and develop a differential diagnosis.

This course will review the different causes of oral ulcerations and the changes that occur in the oral mucosa. Images from actual clinical cases will be used to present examples and discuss the mechanism of ulceration. Specific diagnoses that are linked to oral ulcerations will be discussed and different clinical features associated with the specific diagnoses presented. The approaches that can be used in questioning the patient's chief complaint and history of present illness will be presented to assist in the assignment of potential etiologies and generate a differential diagnosis. Specific diagnostic procedures will be presented to achieve a final diagnosis for the ulcer leading to a specific recommendation for treatment. There will be an emphasis on the normal physiology of the tissue and the changes that contribute to the signs and symptoms seen in the patient. The importance of developing a differential diagnosis will be stressed and based on the clinical examination strengths of the oral health professional.

EDUCATIONAL OBJECTIVES

1. Recognize changes in oral mucosa associated with an oral ulceration
2. Evaluate the clinical history of the oral ulceration and identify factors that contribute to either the etiology or prognosis
3. Develop a process to achieve a definitive diagnosis for an oral ulceration and develop a plan for treatment

CLINICIAN

CHARLES SHULER, BSc, DMD, PhD, Professor, UBC was the Dean of the Faculty of Dentistry of the University of British Columbia for ten years, finishing his second five-year term June 30, 2017. He is now a professor of oral pathology in the Department of Oral Biological and Medical Sciences at UBC Dentistry and teaching oral pathology/medicine. Prior to being appointed at UBC he was a faculty member at the University of Southern California for 18 years. At USC he served as the Director of the University of Southern California Center for Craniofacial Molecular Biology holding an endowed chair position as the George and Mary Lou Boone Chair Professor of Craniofacial Molecular Biology. He also served as the Director of the Graduate Program in Craniofacial Biology and the Associate Dean for Student and Academic Affairs at the USC School of Dentistry. Dr. Shuler received his B.S. in Biochemistry from the University of Wisconsin, his D.M.D. from Harvard School of Dental Medicine, his Ph.D. in Pathology from the University of Chicago and his Oral

Pathology education at the University of Minnesota and the Royal Dental College Copenhagen Denmark. He has been active in assessing and managing clinical oral pathology patients with soft and hard tissue lesions. He has had an active research program funded by national granting agencies that focused on evaluating the molecular regulation of the soft and hard tissues of the secondary palate to better understand the etiology of craniofacial birth defects and pathologic changes of the tissues.

CDE at UBC is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP.

DISCLAIMER: Dental education institutions have an obligation to disseminate new knowledge related to dental practice. Some presentations may include controversial materials or commercial references. Sponsorship of a continuing education course by The University of British Columbia does not imply endorsement of a particular philosophy, procedure or product by The University of British Columbia. Fee in full must accompany registration. The tuition fee is deductible for Canadian Income Tax purposes. See cancellation policy.
