Cone beam computed tomography (CBCT) is a new technology that provides important diagnostic information for endodontic treatment. This course will describe the use of small field of view (FOV) CBCT in endodontic diagnosis and management of cases. Radiographic features of 2D, 3D, and 4D imaging will be discussed. A variety of cases will be profiled to illustrate the impact of CBCT on diagnosis of resorption, fractures, periapical lesions, and tooth anatomy. Evidenced-based literature findings will also be used to support treatment decisions with the use of CBCT.

EDUCATIONAL OBJECTIVES

1. Review the technology of CBCT imaging
2. Understand the applications and indications of small FOV CBCT imaging in endodontics
3. Review the use of CBCT software for identification of periapical lesions, resorption, tooth fracture, and complicated dental anatomy
4. Review how the use of CBCT technology impacts endodontic prognosis
5. Review endodontic cases using CBCT

CLINICIAN

TENZIN DADUL, MDS, BDS, MS, is a Clinical Associate Professor in Oral and Maxillofacial Radiology and a Director of Educational Research, University of Detroit Mercy. He teaches advanced Radiology, CBCT, 3D, 4D, and MRI to dental students and graduate residents in Orthodontics, Periodontics, Endodontics, and AEGD. He is a course director for three graduate and post-doctoral courses. He is an international speaker on radiology and provides continuing education courses to practicing dentists and specialists. He is also an adjunct Associate Professor at the University of North Carolina (UNC-Chapel Hill). Dr. Dadul has received many distinguished awards from various universities. He is the first recipient of the prestigious "Beyond Excellence Award" at the UNC-Chapel Hill in research, teaching, public service, and academic endeavor. In 2014, the University of Minnesota honored him with the “Faculty of the Year” award. In 2020, he received the “Outstanding Didactic Faculty of the Year” award from the University of Detroit Mercy. Professor Dadul maintains an active radiology practice globally.

CANCELLATION POLICY

Cancellations received up to 72 hours prior to the course will receive a 50% refund. No refunds will be given for cancellations received within 72 hours of the course. Please note that Zoom will allow you to cancel out of a Zoom event at any time, however, all cancellations for this course must be made directly with UBC in accordance with this UBC CDE cancellation policy. Continuing Dental Education at The University of British Columbia reserves the right to cancel courses or switch instructors if deemed necessary by low enrolment, instructor cancellation or other unforeseen issues. In case of course cancellation by UBC CDE a full refund will be issued.

The UBC CDE is a member of the Association of Continuing Dental Education (ACDE). The ACDE is an organization that represents college-and university-based continuing dental education programs associated with accredited dental schools in Canada and the United States. The ACDE is here to serve you, the dental professional, in delivering high quality, evidence-based continuing dental education programs to meet your educational needs.

The University of British Columbia, Continuing Dental Education in conjunction with the ACDE, and along with 30 of its member schools, jointly presents the “ACDE Webinar Series”. This series features university-based key opinion leaders presenting on numerous topics on multiple dates and times. Presentations are available to meet every dental health care professional’s schedule and interests.

Please visit dentistry.ubc.ca/cde for a list of ACDE webinar offerings.

The Association of Continuing Dental Education (ACDE) brings together individuals who represent college- and university-based continuing dental education programs associated with accredited dental schools in Canada and the United States.
