DHDP Program Overview

- DHDP Program Overview
- Salima Alibhai, Director, Dental Hygiene Degree Program
What is Dental Hygiene?

- The dental hygiene profession develops and implements health promotion, preventive, and therapeutic interventions in a variety of settings.
- The professional role of dental hygiene is multi-faceted involving 5 primary areas of responsibility:
  1. Clinical Therapy
  2. Health Promotion
  3. Education
  4. Administration
  5. Research
**Why A Dental Hygiene Degree?**

**Motivating Reasons for Pursuing a BDSc(DH):**

- Increase career opportunities
  - Clinical practice in diverse settings, public health agencies, sales/industry, education, research, administration
- Personal development / Desire for more knowledge
- Status of a Degree / Recognition
- Access to Graduate Education
- Requirement for the BCCOHP ‘Dental Hygiene Practitioner’

Why A Dental Hygiene Degree?

Outcomes of Dental Hygiene Education:

- Critical thinking and problem-solving
- Critiquing literature
- Using research in practice decisions
- Written communication
- Use of technology
- Interprofessional collaboration

UBC Dental Hygiene Degree Program
Philosophy & Goals

1. To make a unique contribution to the Faculty of Dentistry’s mission of advancing oral health through outstanding **education**, **research**, and **community service**

2. To offer curricula that is grounded in the integration of **social**, **biomedical**, and **oral health sciences** and responds to the diverse learning needs of its students within an increasingly complex society

3. To prepare dental hygiene graduates with the **academic**, **clinical**, and **community practice education** that fosters strong analytical and problem-solving abilities, exemplary professional judgement, appreciation for sound scientific evidence, excellent communication skills, and abilities to collaborate with other healthcare professionals

4. To prepare dental hygiene graduates for a **variety of professional roles in society** including public health, clinical practice, administration, education, industry, graduate studies, and research
UBC BDSc(DH) Graduate Outcomes Study

- 116 respondents from 1994 to 2016
- 45% of BDSc(DH) graduates work outside of the private clinical practice setting
- 35% indicated the degree was required for employment
- 85% indicated degree was an asset
- Over 25% have competed a graduate degree
  - MSc/PhD, MEd, MET, MPH, MBA, MHA
- Higher inter-professional collaboration scores, full-time annual incomes, and employment benefits when compared to the CDHA’s national job market and employment survey
DH education at UBC is **competency-based**

Competencies describe the essential knowledge, skills and attitudes learners must demonstrate upon graduation from a DH program in Canada.

- Integration of Knowledge
- Professionalism
- Communication
- Collaboration
- Coordination
- Research Use
- Leadership
- Health Promotion
- Disease Prevention
- Oral Health Education
- Advocacy
- Policy Use
- Clinical Therapy
- Scientific Investigation
- Social Entrepreneurship
DHDP – ETP Curriculum - 4 Domains

What Distinguishes UBC Dental Hygiene Graduates?

1. Increased ability to read & to critique literature, to understand the research process, and to translate knowledge into practice
2. Increased ability to function with other health professionals in inter-professional settings (inter-professional education)
3. Increased knowledge/expertise of faculty members
4. Increased abilities related to special care clients and marginalized groups in community
5. Increased understanding of health policy and the role of government in health care
6. Increased ability to be self-directed professionals who are life-long learners
MISSION: To advance oral health through outstanding education, research, and community service.
