## ORAL HEALTH CARE FOR THE HIV PATIENT

DR. RAMA KIRAN CHAVALI

HIV infection is a worldwide epidemic cutting through barriers of race, gender and age. Approximately 1.2million patients currently are affected by this infection in the United States alone. This course will focus on the etiology, transmission, oral manifestations and management of a HIV infected patient. Medical and dental considerations when performing procedures on a HIV infected dental patient will be discussed. Application of the principles of infection control in protection of the dental health care professional and the patient will be emphasized. Post-exposure prophylaxis of occupational injury while treating a HIV patient and currently available treatment will be discussed.

### EDUCATIONAL OBJECTIVES

- Recognize the etiology, signs, and symptoms of HIV/AIDS.
- Understand current dental treatment procedures and protocols in the care of a HIV patient.
- Recognize drugs used in treatment of HIV/AIDS.
- Discuss infection control procedures.
- Implement precautions to avoid occupational injury, and in case of injury, then understand the need and administration of post exposure prophylaxis.
